

WebAssembly

how I learned to stop worrying
and love the frontend

orsinium.dev

Wasm: the final frontend

To boldly go where no man has gone before!

A Talk Near the Future of Python

by David Beazley

meet tiny snek

- Not JS
- Binary
- Native
- Safe
- Easy to run
- Portable

- AssemblyScript
- Rust
- C/C++
- Go

```
package main
```

```
import "fmt"
```

```
func main() {
```

```
    fmt.Println("oh hi mark")
```

```
}
```

```
mkdir -p build
```

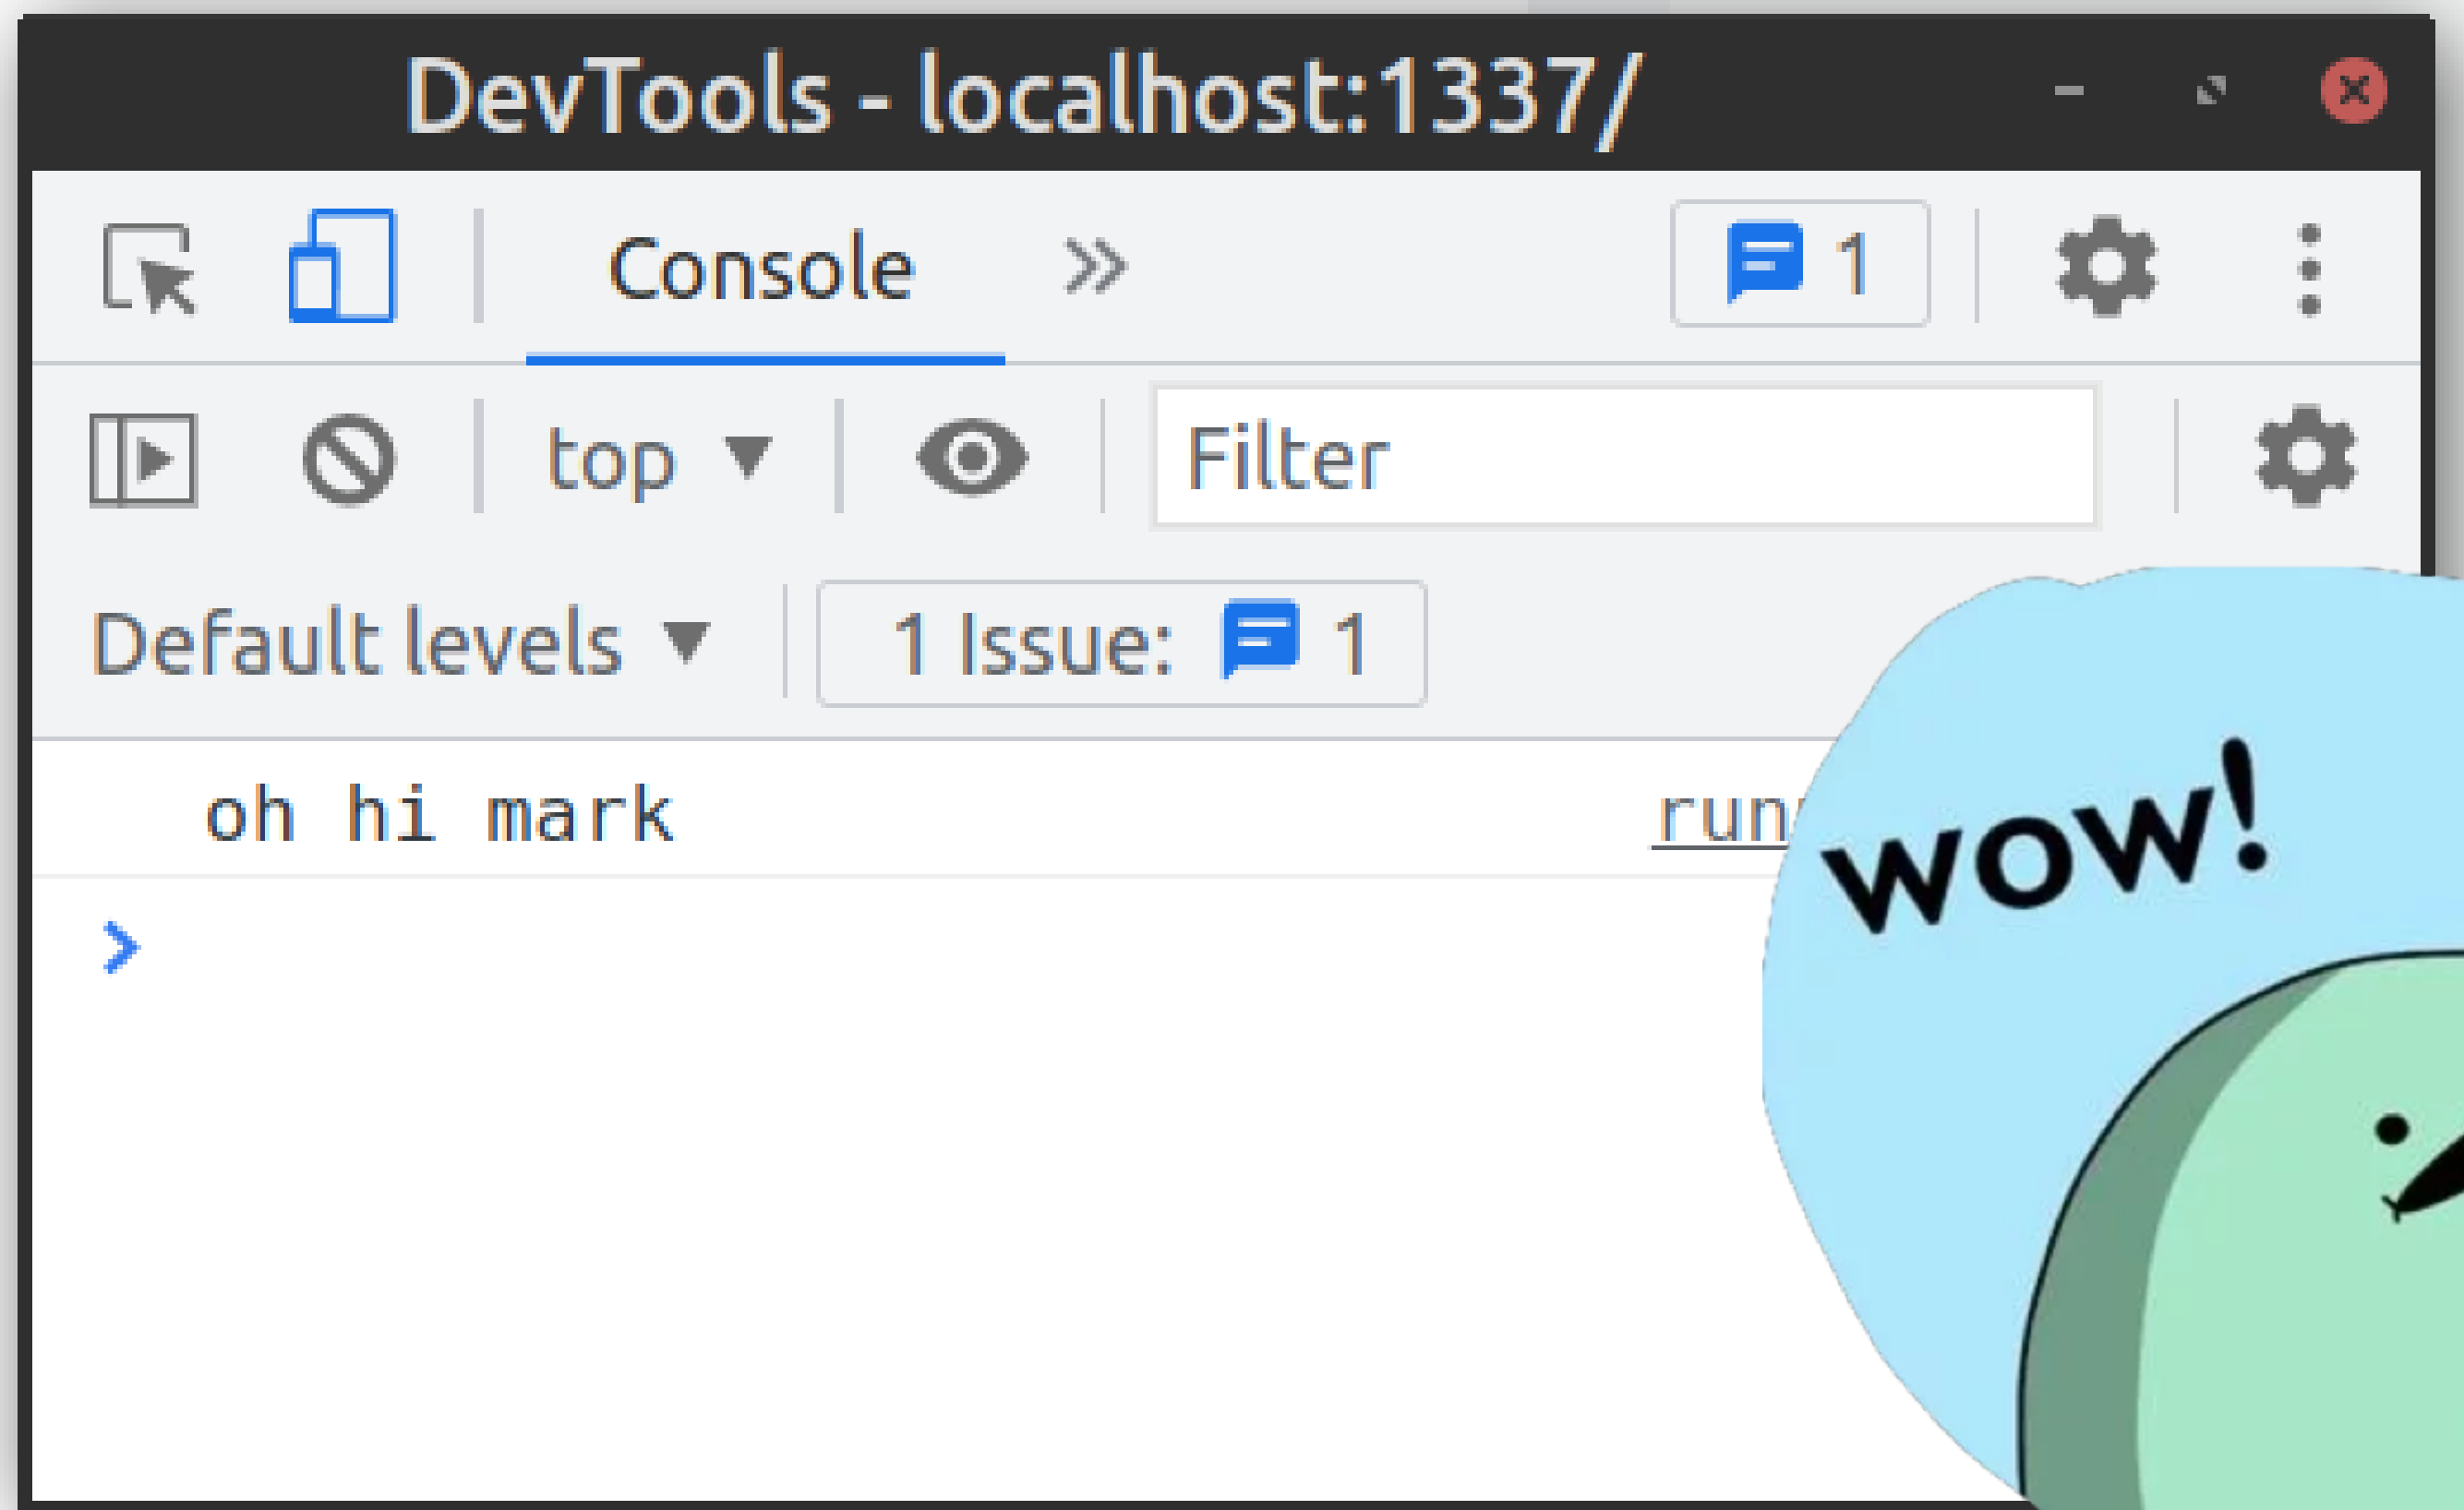

```
cp frontend/* build/
```

```
cp \
```

```
"$(go env GOROOT)/misc/wasm/wasm_exec.js" \
build/runner.js
```

```
GOOS=js GOARCH=wasm go build \
-o build/frontend.wasm .
```

```
<!doctype html>
<html>
  <head>
    <meta charset="utf-8">
    <script src="./runner.js"></script>
  </head>
  <body>
    <script src="./loader.js"></script>
  </body>
</html>
```

```
package main
import "syscall/js"
func main() {
    window := js.Global()
    doc := window.Get("document")
    doc.Set("title", "Welcome page")
    header := doc.Call("createElement", "h1")
    header.Set("innerText", "oh hi mark")
    body := doc.Get("body")
    body.Call("appendChild", header)
}
```

Welcome page - Chromium

Welcome page

localhost:1337

oh hi mark

```
package main
import "github.com/life4/gweb/web"
func main() {
    window := web.GetWindow()
    doc := window.Document()
    doc.SetTitle("Welcome page")
    header := doc.CreateElement("h1")
    header.SetText("oh hi mark")
    body := doc.Body()
    body.Node().AppendChild(header.Node())
}
```

WASI

The WebAssembly System Interface

```
func main() {  
    fmt.Println("I'm in the console")  
    text := []byte("I'm in the file\n")  
    err := ioutil.WriteFile("./log.txt", text, 0644)  
    if err != nil {  
        panic(err)  
    }  
}
```

```
tinygo build \  
  -target wasi \  
  -o wasi.wasm ./wasi
```

```
wasmtime --dir . wasi.wasm
```
